2021 Choice Outstanding Academic Title. Contesting the global order, *Explores* what it means to be a radical intellectual as political hopes fade. Gregory P. Williams chronicles the evolution of intellectual visionaries Perry Anderson and Immanuel Wallerstein, who despite altered circumstances for radical change, continued to advance creative interpretations of the social world. Wallerstein and Anderson, whose hopes were invested in a more egalitarian future, believed their writings would contribute to socialism, which they anticipated would be a postcapitalist future of relative social, economic, and political equality. However, by the 1980s, dreams of socialism had faded, and they had to face the reality that socialism was neither close nor inevitable. Their sensitivity to current events, Williams argues, takes on new significance in this century when many scholars are grappling with the issue of change in a world of declining state power.
