dialogues between psychoanalysis and architecture explores the multisensory space of therapy real or virtual and how important it is in providing the container for the therapeutic relationship and process this book is highly original in bringing psychoanalysis and architecture together and highlighting how both disciplines strive to achieve transformation of our psychic space it brings together contributions that comprise three parts the first explores the space of the consulting room through the senses to examine issues such as smell and its link with memory and belonging hearing out the other the psychoanalytic couch the medical therapy room and the so called sixth sense secondly the book questions how the consulting room can represent or be redesigned to reflect the philosophy that underlies the therapy process foregrounding an architectural point of view and thirdly the book attends to the significance of the consulting room as a virtual space as it emerged during the pandemic of covid 19 and beyond architectural psychotherapeutic and interdisciplinary perspectives allow for an important new dimension on the psychological use of space and will appeal to psychoanalysts psychoanalytic and integrative psychotherapists art therapists students of psychotherapy as well as architects and designers

this pioneering volume explores and exemplifies the relevance of psychoanalysis to contemporary philosophical problems the novelty of the book's viewpoint is the consideration of psychoanalysis as an existentialist mode of thinking that deals with current existential problems such as loneliness uncertainty struggling with personal tragedies and rehabilitation each chapter presents classic aspects of psychoanalytic theory based on greek tragedies as well as their similarities with interdisciplinary aspects in other areas of study like modern literature hermeneutics and philosophy of language to deepen each subject each chapter also applies an interdisciplinary methodology that illuminates previously hidden insights arising from the fusion of psychoanalysis and philosophy featuring contributions from well known scholars like professor avi sagi and professor dov schwartz as well as more up and coming writers the book suggests possible implications of philosophical hermeneutical and literary theories to the perception of post modern issues concerning agency and the subjective emotional world psychoanalytic investigations in philosophy is of great interest to scholars of psychoanalysis and hermeneutic philosophy as well as teachers and academics who want to explore new teaching methods in various disciplines and general interest readers who wish to expand their horizons around concepts that can be applied to better understand

themselves and the age in which we live

we are pleased to present the second volume of our study on psychoanalytic practice which we entitle clinical studies together the two volumes fulfill the functions usually expected of a textbook on theory and technique in fact some reviewers have asked why such a title was not chosen one of the reasons for our narrower choice was that our primary concern is focused on those aspects of psychoanalytic theory that are relevant to treatment the first volume entitled principles has evoked much interest within and outside the professional community creating high expectations to ward its clinical counterpart after all psychoanalytic principles must demonstrate their value and efficacy in treatment i.e. in achieving changes in symptoms and their underlying structures this is apparent in the clinical studies contained in this book and in the process of compiling them the senior author has had the opportunity to take stock of his long professional career

betty cannon is the first to explore the implications of sartrean philosophy for the freudian psychoanalytic tradition drawing upon sartre's work as well as her own experiences as a practicing therapist she shows that sartre was a fellow traveler who appreciated freud's psychoanalytic achievements but rebelled against the determinism of his metatheory the mind sartre argued cannot be reduced to a collection of drives and structures nor is it enslaved to its past as freud's work suggested sartre advocated an existentialist psychoanalysis based on human freedom and the self's ability to reshape its own meaning and value through the sartrean approach cannon offers a resolution to the crisis in psychoanalytic metatheory created by the current emphasis on relational needs by

comparing sartre with freud and influential post freudians like melanie klein otto kernber margaret mahler d w winnicott heinz kohut harry stack sullivan and jacques lacan she demonstrates why the sartrean model transcends the limitations of traditional freudian metatheory in the process she adds a new dimension to our understanding of sartre and his place in twentieth century philosophy

critical theory between klein and lacan explores convergences and divergences in the psychoanalytic theories of melanie klein and jacques lacan with a special focus on the implications of their work for critical theory broadly construed the book is co authored in the form of a dialogue between amy allen a prominent representative of frankfurt school critical theory with expertise on klein and mari ruti a leading lacanian critical theorist klein and lacan are among the two most important and influential psychoanalytic theorists after freud their work has profound implications for how we understand subjectivity intersubjectivity autonomy agency desire affect trauma history and the potential for individual and social change allen and ruti offer distinctive interpretations of klein and lacan that not only bring out their complexities but also highlight productive points of convergence where most psychoanalytic and critical theorists see irreconcilable differences the book is organized around key themes that cut across and through the work of klein and lacan culminating in an assessment of the implications of their theories for thinking about politics bloomsbury publishing

this new hardcover annual offers a unique scholarly format an interdisciplinary dialogue that it is hoped will foster the development of a sound useful methodology for applying psychoanalytic insight to art and artists the series provides a medium for those who study art those who interpret it and occasionally those who create it formally to explore the meaning of an artistic work as the direct reflection of the inner world of its creator within each volume individual topics are addressed by either an art historian or a psychoanalyst with a response frequently tendered by an expert from the other field reviews of important books of cross disciplinary interest are treated in a similar manner and include rebuttals by the authors themselves it is precisely this exchange of ideas among scholars with difference perspectives on the meaning of a work of art that sets ppa apart from the standard art history publication its depth of scholarship coupled with its innovative format make it a fascinating addition to the burgeoning field of psychoanalytic studies of art history

this new book by the influential psychoanalyst roy schaffer focuses on a vacuum that has developed between psychoanalysis and critical

thinkers in the social sciences and humanities schaffer's goal is to weave psychoanalytic discourse into the tapestry of modern trends in intellectual history notably linguistic and hermeneutic approaches to interpretation

a speculative quarterly review

this book brings together twelve of franco borgogno's essays written since 1981 revised and brought up to date for this edition they give the reader an idea of the development of his philosophical and working stance as he has progressed from being a trainee to becoming a training analyst psychoanalysis as a journey is a title which perfectly mirrors the essays it contains the reference is to the journey of insights in the minds of the pioneers of psychoanalysis freud in particular but also ferenczi heimann bion the journey made by their legacy in psychoanalytic institutions the journey made by the analyst as he grows learns and applies what he has learnt and also the journey of the patient a highly stimulating and thought provoking volume it is quite rare to come across a book that combines sound theoretical and clinical psychological arguments with generous disclosure of the progression and development of an author's thought what this volume offers however is just such an itinerary or rather journey and moreover one that is strictly psychoanalytic different levels of this journey emerge as we read the first is that of freud's theoretical development from his first intuitions that led to the creation of psychoanalysis to the key works of his maturity another concerns the vicissitudes of every psychoanalytic process as manifested in the analyst patient interaction a further level of this journey is the evolution of the analytic thought of franco borgogno himself as reflected in the sequence of papers he presents to us here and the highly involving theoretical odyssey they prove to be book jacket

as reflected in the 12 chapters of this book the achievements of psychoanalysis during the first hundred years have been extraordinary each chapter is written by psychoanalysts strongly committed to a particular version of psychoanalysis theory and practice as robert lang's points out in his foreword the varying schools of psychoanalysis have to a considerable extent become relatively insular this book solves this problem by acting as a dynamic showcase for the enormous diversity of explorations and thinking that characterize psychoanalysis today a field to which some of the most brilliant and innovative thinkers of the late twentieth century have been drawn
